ABOUT ROOM CARE

Room care, built around the task

Room Care brings professional hygiene programmes together for bathrooms, hard surfaces, glass, furniture, ambient requirements and room or public-area floors. Each route starts with the area, surface and operating requirement before product selection. Current application guidance, documentation and technical support keep the programme connected to the facility context rather than a generic cleaning routine.

ROOM CARE PRODUCT RANGE

Every current Room Care product appears once in the catalogue.

R1 Bathroom Cleaner **03**

R2 Surface Cleaner **04**

R3 Glass Cleaner **05**

R4 Furniture Maintainer **06**

R5 Air Freshener **07**

R6 Toilet Bowl Cleaner **08**

R7 Floor Cleaner **09**

R8 Heavy Duty Floor Cleaner **10**

R9 Bathroom Cleaner Concentrate **11**

APPLICATION OVERVIEW

WASHROOM CARE

HARD-SURFACE CARE

GLASS AND MIRRORS

FURNITURE CARE

AMBIENT CARE

ROOM/PUBLIC-AREA FLOORS

R1

BATHROOM CLEANER

Routine bathroom-surface cleaner concentrate

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R1 provides a dedicated route for routine bathroom-surface maintenance where consistent cleaning procedure matters more than corrective descaling.

Use it as part of a documented washroom programme after confirming the surface, soil level, dilution and finish requirement. It is not a substitute for the toilet-bowl or corrective hard-water roles covered by R6 and R9.

BENEFITS

- Keeps routine bathroom work separate from specialist toilet-bowl cleaning.
- Supports a repeatable manual cleaning method for trained housekeeping teams.
- Connects product selection with current PIS, TDS and SDS control.
- Helps standardise surface checks, application, wipe and finish steps.

APPLICATIONS

- Bathroom fittings and approved fixtures
- Bathroom walls and approved hard surfaces
- Guest and public washrooms
- Routine housekeeping washroom programmes

DIRECTIONS FOR USE

Apply with the approved washroom cloth or applicator, work the surface and wipe systematically.

Follow the current Everklin TDS and approved site SOP.

R2

SURFACE CLEANER

Multipurpose hygienic hard-surface cleaner concentrate

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R2 supports general room and public-area hard-surface cleaning after the material and finish have been confirmed.

It is the broad routine route in the Room Care family; specialist glass, furniture, bathroom and floor requirements remain with their dedicated products.

BENEFITS

- Simplifies routine hard-surface selection.
- Supports consistent cloth control and area-by-area cleaning.
- Keeps specialist visible-finish and washroom tasks on dedicated routes.
- Works within controlled dilution and documentation practices.

APPLICATIONS

- Approved washable hard surfaces
- Room and public-area touchpoints
- Counters, ledges and approved fixtures
- Routine housekeeping cleaning

DIRECTIONS FOR USE

Apply to the cloth or approved surface area, wipe from clean to soiled zones and inspect.

R3

GLASS CLEANER

Concentrated cleaner for glass, mirrors and visible finishes

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R3 separates glass and mirror care from general hard-surface cleaning so the application method can focus on finish quality.

Good results depend on correct dilution, limited application, clean low-lint cloths and systematic wiping rather than excess product.

BENEFITS

- Dedicated route for glass and mirror finish quality.
- Supports controlled low-volume application.
- Encourages cloth discipline to reduce smearing and rework.
- Connects the task to product-specific documents and guidance.

APPLICATIONS

- Glass doors and partitions
- Mirrors
- Approved glazed surfaces
- Visible interior glass

DIRECTIONS FOR USE

Apply sparingly to the cloth or approved surface and wipe in overlapping passes.

R4

FURNITURE MAINTAINER

Furniture and finished-surface maintenance product

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R4 keeps furniture maintenance separate from broad hard-surface cleaning because finishes, coatings and material response vary.

Selection starts with identifying the substrate and finish, then confirming that the current product guidance supports the intended maintenance result.

BENEFITS

- Dedicated route for furniture and finished surfaces.
- Promotes small-area compatibility testing.
- Supports controlled cloth application with minimal over-wetting.
- Keeps maintenance work linked to current product guidance.

APPLICATIONS

- Approved furniture surfaces
- Finished wood-look and coated surfaces
- Desks, tables and room furniture
- Selected decorative hard finishes

DIRECTIONS FOR USE

Apply a controlled amount to a clean cloth and work with the finish grain or approved direction.

R5

AIR FRESHENER

Ambient-care product for managed interior spaces

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R5 supports ambient freshness in managed interiors; it does not replace cleaning, odour-source removal or ventilation.

Use follows a controlled area procedure that considers occupancy, ventilation, sensitive users and the approved application method.

BENEFITS

- Keeps ambient care separate from surface cleaning.
- Supports controlled, consistent application by trained staff.
- Encourages odour-source correction before fragrance application.
- Connects fragrance use to current safety and product guidance.

APPLICATIONS

- Guest rooms after cleaning
- Reception and public areas
- Washroom ambient-care programmes
- Selected managed interior spaces

DIRECTIONS FOR USE

Complete cleaning and ventilation checks, then apply only by the approved method in the defined area.

R6

TOILET BOWL CLEANER

Toilet-bowl-focused cleaner for controlled washroom maintenance

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R6 is the dedicated toilet-bowl route in the Room Care family.

The procedure must isolate the fixture, control application, respect contact guidance and prevent incompatible chemistry from being combined in the bowl or surrounding area.

BENEFITS

- Separates toilet-bowl work from general bathroom cleaning.
- Supports controlled application to the target area.
- Promotes compatibility checks around fixtures and adjacent materials.
- Keeps contact, rinse and safety controls connected to current documents.

APPLICATIONS

- Toilet bowls
- Approved urinal or sanitary ceramic contexts where documented
- Professional washroom routines
- Mineral-deposit-focused bowl maintenance

DIRECTIONS FOR USE

Isolate the fixture, apply only to the approved bowl area and complete the defined brush-and-rinse procedure.

USE GUIDANCE

Follow the current Everklin TDS and approved site SOP.

R7

FLOOR CLEANER

Routine floor cleaner for wet mopping and machine scrubbing

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R7 is the routine floor-cleaning route for daily or scheduled maintenance on approved floor types.

Selection depends on floor material, finish, soil load, equipment and the current working dilution. R8 is reserved for heavier periodic or corrective soil.

BENEFITS

- Supports manual and machine floor-cleaning programmes.
- Separates routine maintenance from heavy-duty corrective cleaning.
- Encourages floor-type and finish compatibility checks.
- Connects dilution, equipment and finish quality in one SOP.

APPLICATIONS

- Routine wet mopping
- Automatic scrubber-dryer cleaning where approved
- Public-area floors
- Room and corridor floor maintenance

DIRECTIONS FOR USE

Dust-mop first, then wet-mop with clean solution using the approved zone method.

PACKAGING

Confirm current sales pack on quotation

USE GUIDANCE

Follow the current Everklin TDS and approved site SOP.

R8

HEAVY DUTY FLOOR CLEANER

Heavy-duty alkaline floor cleaner and industrial degreaser

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R8 is the heavy-duty floor route in the Room Care family, positioned for mineral and synthetic oils, tar, grease and carbon soot.

The result depends on matching concentration, mechanical action, recovery and rinse to the floor and soil. It should not become the default daily cleaner where R7 is sufficient.

BENEFITS

- Targets demanding oily and carbonaceous floor soil.
- Supports planned periodic or corrective cleaning.
- Works with a process that combines chemistry and mechanical action.
- Helps prevent routine overuse of heavy-duty chemistry.

APPLICATIONS

- Heavy floor-soil removal
- Periodic degreasing of approved floors
- Manual scrubbing
- Approved machine-assisted cleaning

DIRECTIONS FOR USE

Use R7 for routine maintenance unless R8 has been specifically approved for the site programme.

CURRENT TECHNICAL GUIDANCE

Heavy-duty alkaline floor cleaner and industrial degreaser

PRODUCT ROLE

Periodic or corrective floor cleaning

PACKAGING

Confirm current sales pack on quotation

USE GUIDANCE

Follow the current Everklin TDS and approved site SOP.

R9

BATHROOM CLEANER CONCENTRATE

Concentrated bathroom cleaner for hard-water operating conditions

APPROVED PACKSHOT

Current website product asset

OVERVIEW

R9 is the concentrated bathroom route for approved fittings and walls, specifically identified for hard-water conditions.

It should be selected deliberately after checking surface compatibility, deposit type and the current dilution guidance; routine maintenance remains the R1 role.

BENEFITS

- Provides a distinct hard-water-focused bathroom route.
- Supports corrective work without turning routine cleaning into over-dosing.
- Keeps compatibility and dilution checks central to selection.
- Connects concentrated use to controlled documents and technical review.

APPLICATIONS

- Approved bathroom fittings
- Approved bathroom walls
- Hard-water-condition washrooms
- Corrective bathroom cleaning programmes

DIRECTIONS FOR USE

Use R1 for routine maintenance unless R9 has been selected for the site condition.

PROFESSIONAL ROOM CARE, BUILT AROUND THE TASK.

Selection begins with the operating area, surface and soil level. Everklin then connects the relevant Room Care route to current guidance and technical support.

01 Task-led selection

Start with the room, washroom, visible surface, furniture, ambient or floor requirement.

02 Application guidance

Keep the selected route connected to a controlled, site-appropriate method.

03 Current documentation

Use current product information and safety documents for the product in use.

04 Technical support

Bring the operating context into the review when the task needs more than a routine route.

TECHNICAL SUPPORT

Start the right programme
with the task in front of you.
